AMENDMENTS TO THE CLAIMS:

This listing of the claims will replace all prior versions, and listings, of the claims in this application:

Please cancel claims 8 and 10-12 without prejudice.

Listing of Claims:

1. (Currently Amended) A method of user data entry, at a terminal, for communication to a remote destination comprising:

   a) displaying at least one data entry field to a user;

   b) automatically displaying a user selectable icon in response to user selection of the data entry field;

   c) in response to the selection of the user selectable icon, calling a security routine which prompts the user for a password; and

   d) upon successful completion of the security routine, granting access an electronic wallet application for transfer of data into the data entry field

   ~~and c) providing, to the user, access to an electronic wallet application, for the transfer of data into the data entry field, in response to user selection of the icon.~~

2. (Original) A method as claimed in claim 1, wherein the wallet application includes a secure collection of personal data.

3. (Original) A method as claimed in claim 2, wherein at least some of the personal data is for completing an electronic commerce transaction.

4. (Original) A method as claimed in claim 1, wherein the terminal is an Internet terminal.

5. (Original) A method as claimed in claim 1, wherein the terminal is a handheld mobile Internet terminal.

2

6. (Original) A method as claimed in claim 4, wherein the remote destination is an electronic commerce server.

7. (Original) A method as claimed in claim 4, wherein steps a), b) and c) are provided by a browser application.

8. (Canceled).

9. (Currently Amended) A method as claimed in claim 1 8, further comprising the step of displaying the user selectable device or icon in a position adjacent the data entry field.

10. (Canceled).

11. (Canceled).

12. (Canceled).

13. (Currently Amended) A method as claimed in claim 1, further comprising the step of automatically transferring data from the electronic wallet application into the data entry field, in response to user selection of the icon.

14. (Currently Amended) A method as claimed in claim 1, further comprising the step of providing for user selectable transfer of data from the electronic wallet application into the data entry field, in response to user selection of the icon.

15. (Canceled).

16. (Currently Amended) A computer readable medium encoded with a computer program comprising a) computer code for displaying at least one data entry field to a user; b) computer

code for automatically displaying a user selectable icon in response to user selection of the data entry field; c) computer code for calling a security routine in response to the selection of the user selectable icon; and d) ~~and e)~~ computer code for providing, to the user, access to an electronic wallet application, for the transfer of data into the data entry field in response to successful completion of the security routine ~~, in response to user selection of the icon~~.

17. (Currently Amended) An apparatus ~~A data entry terminal, for communication of data entered by a user to a remote destination,~~ comprising:

    a display ;

    a user input interface for selection of a ~~the~~ data entry field and a displayed icon; and

    a processor operable :

        to detect the user selection of a displayed data entry field;

        to provide a user selectable icon automatically in the display, in response to the detection of the user selection of the displayed data entry field;

        to detect user selection of the displayed icon;

        to call a security subroutine upon detection of the user selection of the displayed icon; and

        to grant access to an electronic wallet application for transfer of data into the data entry field upon successful completion of the security routine

        ~~and to provide, to the user, access to an electronic wallet application, for the transfer of data into the data entry field, in response to the detection of the user selection of the icon~~.

18. (Currently Amended) A method of user data entry, at a terminal, for communication to a remote destination comprising:

    (a) displaying at least one data entry field to a user;

    (b) detecting user selection of the displayed data entry field;

    (c) automatically detecting whether a wallet application is enabled;

    (d) displaying an icon, for user selection, if a wallet application is enabled, and not displaying the icon if the wallet application is not enabled;

      (e) <u>calling a security routine in response to the user selection of the user selectable</u> <u>icon in which the user is prompted to provide a password;</u> and

      (f) providing access to the electronic wallet application, for the transfer of data into at least the data entry field, <u>upon successful completion of the security routine</u> ~~in response to~~ ~~user selection of the icon~~.

19. (New) An apparatus according to claim 17, wherein the apparatus comprises a data entry terminal for communication of data entered by the user to a remote destination.
